SENATE

S. No. 50

RECEIVED BY: 

Introduced by Senator Edgardo J. Angara

EXPLANATORY NOTE

This bill seeks to reorganize the Department of Transportation and Communication by creating a separate Department of Information and Communications to address the distinct needs of the communications and transportation sector.

Section 24, Article II of the 1987 Philippine Constitution declares that the State recognizes the vital role of communications and information in nation-building. To implement this State policy, a Department of Transportation and Communications was created under the Administrative Code of 1987 to maintain and expand a viable, efficient, safe and dependable transportation and communications systems as effective instruments for national recovery and economic progress. Due to the divergent issues on transportation and communications, a single department should focus on each one to intensify government initiatives and cope up with the demands of globalization.

Under this proposed measure, the Department of Information and Communications shall be the primary policy, planning, coordinating, implementing, regulating and administrative entity of the executive branch of the Government that will promote, develop, and regulate integrated and strategic ICT systems and reliable and cost-efficient communication facilities and service. This will ensure that the communications and information technology sector of the country be given appropriate focus and be included as one of the priorities of the government.

In view of the foregoing, immediate passage of the bill is earnestly sought.
